Report of the Mayor

To the Citizens of Rutland:

I hereby submit, for your consideration, my eighth annual report as Mayor of the City of Rutland for the year ending December 31, 1926.

In co-operation with members of the City Council, I have tried in the eight years I have held this position to carry out the duties of the offices I was elected to for the best interests of the people I represent. Again, through the efforts of Treasurer Davis, I was able to issue the street improvement, sewer and sidewalk bonds amounting to \$35,000.00 at 4 1/4 %, as well as receiving a premium of \$1,050.00 on these bonds.

As will be shown by the report of the City Treasurer, we have a cash balance on hand December 31, 1926, of \$41,899.39, same being \$4,476.64 more than last year; although there has been quite an increase in some of the departments in the way of salaries. While there was issued this last year \$35,000.00 in new bonds, through the payments of bonds and sinking fund earnings, our bonded debt was increased only \$2,453.04, as shown from the following figures taken from the report of the Treasurer.

This is made up as follows:

Street improvement bonds	\$20,000 00
Sewer bonds	10,000 00
Sidewalk bonds	5,000 00
<hr/>	
	\$35,000 00
General appropriation to sinking fund	\$12,000 00
School bonds 591-592 paid from general account	2,000 00
Street improvement bonds 1-10 paid from general account	10,000 00
Sinking fund earnings	8,546 96
<hr/>	
	32,546 96
<hr/>	
	\$2,453 04

Total bonded debt	\$628,000 00
Less sinking fund, water	\$63,399 28
Less sinking fund, general	96,813 84
	160,213 12
Net debt of City December 31, 1926	\$467,786 88
Net debt of City December 31, 1925	465,333 84
Increase in net debt	\$2,453 04

As was shown in last year's report the first bond issue for \$50,000 was paid up at that time and the \$10,000 paid this year in the above statement is on the second \$50,000 bond issue, all paid from taxes. Sinking fund commissioners have paid bonds to the amount of \$100,000 this last year.

In order to meet our running expenses, our tax rate was increased the past year from \$3.10 to \$3.20, and now we are much lower than many other places in the State. Again the finances of our City are in most excellent shape, and I trust everyone will read very carefully the fine report of the Treasurer, Will L. Davis.

We made the final settlement with the Rutland Railroad and Delaware & Hudson Co. for their portion of the expense on River St. bridge, amounting to \$5,717.74, this year.

As will be shown by the Treasurer's report, due to the new tax on intangibles, our receipts were cut down quite a bit. After the \$30,000 water department bonds, due January, 1929, are retired, there will be no more bonds due until 1937 and 1938.

After retiring the above water department bonds, we will still have a balance in the water sinking fund of about \$34,000, and this amount will increase some in the next two years.

Our Hospital account was greatly reduced this year as you will see by the Treasurer's report. We have no outstanding indebtedness in any of the departments, and the balance left over in these departments will all be available for next year's work.

The water account was extremely taxed this past year by the laying of so many new mains, services and hydrants, part of this being brought about by the insurance exchange recommendations.

There should be something done about the oil and sprinkling assessments, as this is the most unsatisfactory account that we have, and makes work, as well as causes more trouble and explanation in the Treasurer's and Engineer's offices than any one thing we have to do with. This cannot be changed without changing the charter and I think this should be done at this time.

The Treasurer's office did an exceptionally good job in collecting past due taxes, water and sprinkling assessments, as you will see by the report.

DEPARTMENT OF PUBLIC WORKS

This department, up to August 1st, was in charge of Joseph P. Feeley, who resigned to take up a new position in Boston. The City of Rutland is indebted to Mr. Feeley for all the construction work that was accomplished by him, as well as the big saving in costs, as well as perfecting the organization that we have; putting the records in the Engineer's office in most complete shape for reference. The condition this office is in at the present time is most valuable to our City Clerk and Treasurer. You will find not only the records as they should be, but complete maps of the City, the sewer and water system, as well as the watershed and reservoirs. This department was taken over by Richard H. Royce on August 1st, and, I am pleased to say, is being well handled by him. The force is the same, and I trust that my successor will retain this organization, as I feel that all the foremen and men connected with it are capable, experienced, and working for the best interests of our City.

The last of the bond issue was expended this year. There were built from funds made available from the bond issue

143,233 sq. yds. of permanent paving, an equivalent of 13.56 miles of 18-ft. roads, made up as follows:

98,100 sq. yds., or 9.29 miles, of 18-ft. road of reinforced concrete
 35,200 sq. yds., or 3.34 miles, of 18-ft. road of Kentucky Rock Asphalt
 9,853 sq. yds., or .93 mile, of 18-ft. road of bituminous macadam

The past year, the following permanent road work was done from the balance of the bond issue:

West St. from Wales to Main St., Kentucky rock asphalt.
 Willow and Edson Sts., reinforced concrete.
 Pine St., from West to Howe St., reinforced concrete.
 Church St., from Crescent to intersection of North and Lincoln Boulevard, Kentucky rock asphalt.
 Madison St., from Strong's Ave. to Main St., Kentucky rock asphalt.
 Approaches to Dorr Bridge, Kentucky rock asphalt.
 South Main St., west side of Park, bituminous macadam.

A number of streets, as will be shown by the commissioner of Public Works Department, were graveled. 44,028 sq. ft. of cement concrete sidewalk were laid the past year.

GENERAL DEPARTMENT

Repairs were made on the Dorr bridge, as well as West St. bridge. Concrete hand rails were extended on the east and west approaches to River St. bridge. New concrete bridges were built on Granger and North Sts. to replace the old wooden ones. A concrete curbing was put around the lawn in front of City Hall, as well as a new concrete sidewalk on the Washington St. side of City Hall property.

WATER DEPARTMENT

Mr. Francis Tracy, who has looked after this department so faithfully for a number of years, resigned in October on account of ill health, and the City lost a faithful employee.

Edward S. Beardsley was appointed to take his place and I feel sure he is going to make good. We purchased for this department this last fall a new Dodge truck, and it will more than pay for itself in the saving of time and trucking hire. The usual amount of new services, several new hydrants installed, as well as new mains, as mentioned previously in this report.

DEPARTMENT OF PUBLIC SAFETY

Again I feel that this department has been well looked after under the direction of Commissioner Fred C. Roberts.

FIRE DEPARTMENT

This department, as before, has been most efficiently and economically administered under Chief A. H. Koltonski and his assistants. The department has been extremely fortunate the past year with more calls than ever before in its history, to have so small a fire loss, as will be shown in the Chief's report. All due to the work and efficiency of the men in this department and nothing else, and I am proud of them.

POLICE DEPARTMENT

This department, like the fire department, has been most efficient under the supervision of Chief Roy H. Leonard and his assistants. The Patrol wagon purchased the past year has been a great help.

DEPARTMENT OF CHARITIES AND CORRECTIONS

This department has been well managed under the supervision of Mr. and Mrs. Hickey. This past year we turned over to them the admitting of patients in the Rutland Hospital, and it has worked out very well and saved the City money.

MEMORIAL LIBRARY

The same appropriation to the Library, \$5,500.00, was made this last year and the sum is well expended by the ladies in charge.

CONCLUSION

In conclusion, again I want to express my sincere appreciation to the Board of Aldermen, who have been associated with me this past year in the administration of City affairs; to the City Treasurer, City Clerk, Commissioners of Public Works, and Public Safety, to the heads and foremen of the different departments, as well as the men under them. Without the fine co-operation that has existed, we could not have accomplished the results as shown in the reports of the different departments. Not only do I want to thank the above officials and the men connected with the different departments for their help and co-operation the past year, but for the whole eight years that I have been Mayor.

Respectfully submitted,

JAMES C. DUNN, Mayor.

Report of the City Treasurer

Gentlemen:—I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1926:

RECEIPTS	
Taxes received by City Treasurer	\$398,722 67
Water, schedule rates	24,053 17

Respectfully submitted,

HENRY F. FIELD
CHARLES M. SMITH,
CHARLES H. LANDON,
Sinking Fund Commissioners.

Report of the Commissioner of Public Works

To the Honorable City Council:

Gentlemen:

In accordance with the provisions of the City Charter, I submit the annual report of the Commissioner of Public Works, for the year ending December 31, 1926.

This department was under the able direction of Joseph P. Feeley, Commissioner of Public Works, until August 1, 1926, at which time the present incumbent took office. Mr. Feeley was appointed in June 1921, and the largest part of the bond issue paving program was done under his direction, the last of the money being spent this year. His departure may well be regarded as a loss to the City.

Mr. Frank Tracy, who has given ten years of faithful and conscientious service to the City in his capacity as Superintendent of Water Works, was compelled to resign in October, because of failing health, and Mr. Edgar S. Beardsley was appointed November 1st, to succeed him.

Organization of the Public Works Department.

Office:

Frank L. Rice, Ass't. City Engineer.
Leon Hinckley, Clerk.

Outside force:

James McLaughlin, General Superintendent.
John Conner, Construction Foreman.
Joseph Mahar, Carpenter Foreman.
Carlos Colvin, Chief Mechanic.
Joseph Stacey, Sewer Foreman.
Leslie Gray, Paving Foreman.

J. Howard, Jr., Sidewalk Foreman.

Water Department:

Edgar S. Beardsley, Superintendent.

E. Gallagher, Foreman.

J. Reilley, Foreman.

F. Lynch, Foreman.

BOND ISSUE FOR PERMANENT PAVING

This year marks the completion of the Bond Issue, which was started in 1920. The total amount of funds thus made available was \$335,620.29.

For this expenditure approximately 143,233 square yards of paving was done, or an equivalent of 13.56 plus, miles of 18 foot road.

The paving consisted of three types: reinforced concrete, Kentucky Rock Asphalt and bituminous macadam.

There were 98,100 square yards of reinforced concrete laid at a cost of \$268,312.04 for an average cost of \$2.735 per square yard, or an equivalent of 9.29 miles of 18 foot road, at an average cost of \$28,882.51 per mile.

There 35,200 square yards of Kentucky Rock Asphalt laid at a cost of \$56,846.95 for an average cost of \$1.61 per square yard or an equivalent of 3.34 miles of 18 foot road at an average cost of \$17,015.70 per mile.

There were 9,853 square yards of bituminous macadam laid at a cost of \$10,461.30 for an average cost of \$1.062 per square yard or an equivalent of .93 miles of 18 foot road at an average cost of \$11,211.95 per mile.

It might be well to note that had the abutter's law been in effect, three times as much paving could have been done.

BOND ISSUE WORK THIS YEAR

West Street was paved from Wales Street to Main Street. Kentucky Rock asphalt being laid in the center and bituminous macadam on the shoulders.

Willow and Edson Streets were paved with reinforced concrete, and Pine Street was paved from West Street to Howe Street with the same material.

Kentucky rock asphalt was used in paving Church Street from Crescent Street to North Street, and on North Street, from Church Street to Lincoln Boulevard.

The three approaches to Dorr Bridge were paved with rock asphalt. Madison Street was paved with a center strip of rock asphalt, and it was planned to complete the sides with bituminous macadam, but the available funds were exhausted and this work had to be postponed.

STREET DEPARTMENT

This department covered the car track areas on State Street, West Street, Grove Street, Merchants Row and Strong's Avenue, with Kentucky rock asphalt, built a bituminous macadam road on South Main Street Park road, from about 165 feet north of Washington Street, southerly to join the South Main Street pavement. This work was partly paid for by abutting owners. A short stretch of rock asphalt was laid in the Depot Park grounds at the expense of the Rutland Railroad Company.

The streets were cleaned as usual in the business and residential sections. The streets were cold-patched by a patrolman during the warmer months and a considerable amount of scarifying, shaping and rolling was done on streets that had become so rough as to impede traffic. Our steam roller was purchased in 1907, and while showing its years is still fairly serviceable. The joints and cracks in the concrete walks and pavements were cleaned and sealed and about 2751 tons of stone were crushed at the stone quarry.

The three trucks that the City now owns are old and decrepit, and the annual repair bills made necessary to keep them running are too high for economical transportation.

The tractor which we had, was in such shape that it could not move no its own power, and it was replaced with a new one in October.

Applying gravel and contingent grading and shaping was done in various parts of the City and includes work done on Lincoln Avenue, James Street, Bellevue Avenue, Grove Street, Baxter Street, Chestnut Avenue, Cleveland Avenue, Convent

Avenue, Court Square, Cramton Avenue, Crescent Street, East Washington Street, First Street, Forest Street, Harrington Avenue, Hazel Street, Jackson Avenue, Kendall Avenue, Killington Avenue, Kingsley Avenue, Grant Avenue, Burnham Avenue, Meadow Street, Park Street, Temple Street, Tremont Street and Water Street.

Water sprinkling of streets was done in the business district and oil and calcium were applied in the residential sections.

Some curb was laid on West Street, the cost being met by the abutting owners.

As mentioned in previous reports snow and ice removal, plowing streets and walks, and applying sand to slippery walks is fast becoming a serious item in the City budget.

The attitude of the public here, which is but a reflection of the general tone all over the country, is that the streets and walks be kept free from hampering snow all through the winter, and as the duty of this department is to satisfy the public demands so far as commensurate with the funds available, considerable money was spent last year in snow removal, and inasmuch as there is no special appropriation for this it must come from money which was intended to be spent on street work, and of a necessity the street work must suffer. The amount spent on snow removal last year was in the vicinity of \$4,000.00.

Once again it is urged that a special appropriation be made to the street department to pay for plowing walks and streets, removing ice and snow and sanding slippery walks.

SEWER DEPARTMENT

The new work done this year was in conformity with the plan leading toward a comprehensive sewer system in so far as the proposed work could be made to meet existing conditions.

As is the case in most cities that have a gradual growth over a long period, sewers have been built here and there without regard for future needs, and in many instances, but slight or no data is available as to their size, depth or location.

There are a number of sewers where size will not allow a free flow of sewage after sudden rainstorms or in flood conditions, and one in particular is the so-called Moon Brook sewer

system, which follows the general line of Moon Brook, from east of Main Street to its outfall in Otter Creek.

This sewer becomes gorged, overflows, backs into cellars and creates an insanitary condition which is a menace to the public health. A relief sewer should be built parallel to this of sufficient size so that the combined sewers will provide room enough to carry off the storm flow for the present. When necessity arises for more room the old sewer can then be relaid with a large enough sewer to provide the final size needed.

Work was completed on the 57 in. diameter concrete sewer in Pine Street under the tunnel this spring. This new sewer runs from a manhole at the end of the trunk sewer in West Street opposite the so-called "Morgan Block" under the south walk to the center line of Pine Street, thence along the approximate center line of Pine Street to a manhole opposite the middle of Grimm's factory, where it connects with the old sewer which ran from the same manhole at the Morgan Block under the west abutment of the Rutland Railroad Company's bridge. This old sewer was in very dangerous condition, and had it collapsed as it threatened to do, would have caused extensive damage and disorder, as it was the bottleneck for sewage from all over the northeast section of the City.

660 feet of 12 in. sewer were laid easterly in Jackson Ave., from the center line of East St., thence in same course 195 feet of 10 in. sewer, to a point in range with a line 16 feet east of the east side of house No. 75 Jackson Ave., thence northerly in this line 415 feet of 10 in. sewer to the approximate center line of Engrem Ave. if extended, thence 350 feet of 10 in. sewer westerly in this line to a terminal manhole.

335 feet of 10 in. sewer were laid in the north gutter of Convent Ave., from a rebuilt manhole opposite from about midway between No. 126 and No. 128 Convent Ave., westerly to an existing manhole in the center of Meadow St. By laying this in the north gutter we avoided ledge excavation.

250 feet of 8 in. sewer were laid in Litchfield Ave., from an existing Manhole in Temple St., to 250 feet easterly. About 75 per cent of the excavation was rock cut.

122 feet of 10 in. sewer were laid southerly to center line of Forest St., from the south bank of Moon Brook just west of the Forest St. Bridge, thence 228 feet of 8 in. sewer along the approximate center line of Forest St., to the approximate center line of Park St., thence 200 feet of 8 in. sewer southerly along the approximate center line of Park St.

920.5 feet of 10 in. and 12 in. sewer were laid in Bellevue Ave., northerly from the approximate center line of Jefferson St.

200 feet of 8 in. sewer were relaid in Court Square from opposite the entrance to the Odd Fellows Home to West St., then down West St. to connect with the 18 in. there.

440 feet of 8 in. sewer were laid in Seabury St., from about the middle easterly to near Church St.

72 feet of 8 in. sewer were laid in White Alley, as a part of the sewer work to be done therein in connection with the agreement made with Frank D. White concerning the widening of Grove St., in 1923.

Numerous leaks and plugs were dug up, sewers and catch basins were cleaned and new basins and manholes were built as shown in the tables.

SIDEWALK DEPARTMENT

44,028 sq. feet of Cement Concrete sidewalks were built this year, which is equivalent to 1.667 miles of 5 foot walk. The cost of these walks is borne, one half by the City and one half by the abutting property owners.

GENERAL DEPARTMENT

This department takes care of the Bridges, Parks, Dumps, and miscellaneous odd jobs.

Among the larger jobs was the work done in jacking up and strengthening Dorr Bridge. This was done when Otter Creek was frozen and the blocking was placed on the ice. This is not a permanent repair job, and a new steel or concrete bridge is indicated at this place.

West St. Bridge was also temporarily repaired and strengthened and must be replaced with a new structure. Neither of these bridges is safe for modern heavy traffic.

Reinforced concrete hand rails were placed at the east and west approaches to River St. Bridge and some curb nosing was attached to the curb on the west ramp.

State Street bridge sidewalks and the area occupied by the car track became dangerous, and the walks were replanked and the car track area repaved with wood blocks, which were formerly on River Street bridge. Two new concrete bridges were built, one an arch type over Moon Brook on Granger Street, and one flat slab type over Tenney Brook on North Street. One-half the cost of the latter was met by the State, as this is on a selected highway.

The flooring on the wooden bridge on Pearl Street broke through and had to be replanked and the small bridge on Jackson Avenue collapsed and the stone abutments had to be relaid entirely.

Work was done on culverts on Vernon Street, Stratton Road, Lincoln Avenue, Church Street and Curtis Avenue.

The triangular plot of land at the City Hall was graded and enclosed in a concrete curb, and about 1,600 square feet of cement walk laid.

The reinforced concrete building on Pine Hill to house the machinery and equipment there, was finished this spring.

A high board fence was built around the dump on River Street, and considerable quantities of earth were hauled there to cover up some of the more offensive refuse. A man is kept all year at the dump to disinfect it and to regulate the distribution of material brought there.

Main Street Park was mowed and cared for during the summer months, and a reinforced concrete band stand with wooden columns and roof was built there this summer.

A street lighting system was installed in Evelyn Street, the standards being paid for by various interested merchants.

Brush was cut and weeds mown along some of the streets.

A flag pole was erected for the American Legion, surveys made for Exchange and Rotary Clubs, election booths were moved, cleaned and repaired, and miscellaneous carpentry and painting done in the City Hall. Necessary office supplies were purchased for the Department of Public Works.

WATER DEPARTMENT

Several water mains and connections were laid this year in conformity with the plan drawn reflecting the ideas of the New England Fire Insurance Exchange with the object of ultimately reducing the fire insurance rates.

The 12 in. main at West and Pine Streets was tapped for an 8 in. main for Pine Street. This was extended to Howe and Forest Streets a distance of 825 feet, including the fire line at Burditt's mill, was connected with 6 in. main there, and was then extended on Howe Street to Franklin and Granger Streets with a 12 in. main and connected with a 6 in. main at Union and a 4 in. main at Franklin Street, a distance of about 1,000 feet. Necessary valves being installed at street intersections. A 6 in. main was also laid on Forest Street from School Street to Union Street and connected to a 6 in. main at this point. The 6 in. main on West Street west of Pine Street was discontinued to a point east of the railroad at West and Forest Street, and the 12 in. main was tapped and the 6 in. main connected to the 12 in. at this point.

The fire protection line on West Street to Burditt's mill was discontinued and a new 8 in. line laid from Pine Street.

The 12 and 16 in. supply mains from the Mendon Reservoir, were tapped on North Street, east of Bellevue Avenue and a 16 in. crossover was laid between these mains to equalize the flow from this point through the main circuits and to provide for turning the water from one pipe into the other in case of a break in either main below this point.

About 1,000 feet below the main reservoir at Mendon, the 16 in. main and cross-over were tapped and sleeves and valves put on to connect with a proposed 20 in. main from the reservoir to this point. This work was done in accordance with the before mentioned ideas of the Fire Insurance Exchange.

The regular work of the department was done as follows:

A 6 in. main at Temple Street and Litchfield Avenue was tapped and a 6 in. main was laid on Litchfield Avenue about 265 feet; a 6 in. main was laid in Coolidge Avenue for 48 feet south of Marble Avenue; a 6 in. main was laid in Seabury Street, from

near the middle to the east end about 463 feet, and a 6 in. main extension was laid on Charles Street about 60 feet easterly.

The 6 in. main on Curtis Avenue was lowered on an average of 3½ feet, this was made necessary by street grading done in 1925. The hydrant near the railroad track on this street was also lowered about 4 feet.

New two-way hydrants were installed at the following locations; Curtis Avenue, corner of Horton Street; South Main Street, near Allen Street; Willow Street, near Howe Ice Cream plant; Mansfield Place, east of Main Street; and Sheldon Place at the corner of Terrill Street. A hydrant drain was laid at the head of Franklin Street; 3 two-way hydrants broken by autos were repaired, and two old hydrants replaced with new ones. Thirty-eight new services were laid and sixty-seven services re-laid or repaired. The hydrant at Lincoln Avenue and Kendall Avenue was replaced with a new one and location changed to conform with new walk, and a new drain was laid to the sewer.

The land set out in pine trees was patrolled and the causes of blister rust removed, the heavy growth of brush over the two supply mains in the swamp north of Tenney Brook was cut, expediting the moving of material to this place, the Gleason reservoir was cleaned and repaired, meter repairs were made as necessary, as were repairs to watering troughs and drinking fountains.

Many minor repairs necessary to keep the system functioning properly were made.

The chlorination of water at the reservoir intake has been done as in the past years, and the reports from the State Board of Health show our water to be excellent. The precipitation records for 1926 as kept by Mr. G. H. Ross, U. S. Cooperative observer, show the following:

Month	Snow	Rain	Total precipitation
January	30.9	.85	2.25

The following recommendations are submitted for your consideration:

That more money be annually appropriated for street maintenance and repair.

This amount which is known as the highway appropriation is 20 cents on the dollar of the grand list and amounted to \$25,-

ANNUAL REPORT

281.28 for the year of 1926, and \$19,101.74 for the year of 1912. The cost of material and labor has increased about 140 per cent since 1912, while the street appropriation has increased only about 32 per cent. The street department has not only this handicap to overcome, but has the problem caused by wearing out of pavements due to automobile traffic, which in 1912 was almost negligible. Also the cost of snow removal is borne by this department, and this in itself is becoming a larger item each year. The mileage of streets is greater now than in 1912, and streets which were all right for horse drawn traffic then, are far from satisfactory for the swift moving motor vehicle of today, but as said before, the ratio of the tax diverted to the street account has not increased. There has been in the last 6 years considerable additional money appropriated to building of new pavements, but these funds could not be spent except for that purpose, and have nothing to do with the problem of street maintenance as a whole.

That the City Council pass a resolution prohibiting the acceptance of new streets until the person or persons directly benefiting thereby do some of the work to make it available as a street. The cost of opening new streets is chargeable to the street department above mentioned, and the amount of taxation received by this department from new buildings is practically negligible. The City of Burlington has adopted stringent regulations in this case, requiring sidewalks, curbs, gutters, water, sewer and gas to be laid and a complete survey and description to be made all subject to the approval of the City Engineer, before a street may be accepted.

That preferably two and at least one of our three obsolete trucks be turned in and replaced with new 3½ ton trucks. The cost of maintaining these three trucks, one of which is nearly ten years old was about \$4,000.00 for the year 1926, and this does not include oil and gasoline. To this may be added the delay and consequent loss due to their breaking down when most needed.

That a committee be appointed to consider the advisability of changing the present method of assessment for street sprinkling. These assessments amount to about \$4,000.00 a year in

CITY OF RUTLAND

amounts averaging around \$2.50 and are based on the square yards sprinkled in front of each property. There seems to be a fairly well defined objection to them by the taxpayers, coming as they do after the regular tax has been paid, and the expense of preparing the bills and sending them out is considerable. The method now followed is that prescribed by the City Charter and any change would require an amendment.

That the work in the Water department as started this year to conform with the requirements of the New England Insurance Exchange be carried on as intended and that the recommendations as made in the 1925 report and not yet carried out, be completed.

CONCLUSION

In this necessarily brief report I have endeavored to give you a summary of the work done in this department. There is a more detailed record of the work performed on file in this office, for the inspection of those who care to see it.

I believe the personnel of the Department of Public Works to be well above the average, and consider that much credit is due them for their loyalty, skill and hard work.

I wish to express to the Honorable Board of Aldermen my sincere appreciation of the most needed cooperation and assistance so willingly given.

To His Honor the Mayor J. C. Dunn, who is relinquishing his office after eight years of the most progressive administration this City has had, I wish first to express my congratulations on what he has accomplished, and to thank him for the valuable advice which it has been my pleasure to receive during the few months I have served directly under him.

Respectfully submitted,

RICHARD H. ROYCE,
Commissioner of Public Works

Report of Commissioner of Public Safety

January 26, 1927.

To the Honorable City Council:

I hereby submit my report as Commissioner of Public Safety of the Fire and Police Departments for the year ending December 31, 1926.

FIRE DEPARTMENT

The Fire Department is composed of the Chief Engineer, Assistant Engineer, two captains, ten regular firemen, a steamer engineer and ten call men. Three of the call men sleep at Station No. 1 and respond to all alarms during the night with the regular men.

The Chief Engineer, Assistant Engineer, one Captain, seven regular men and three call men are located at Station No. 1 and three men and a captain at Station No. 2.

Two hundred and forty alarms were answered during the year, 69 more than in 1925: 198 telephone, 28 bell, 12 still and 2 thermostat, and the fire loss, \$21,741, was remarkably low as the appraised value of exposed buildings and contents was \$2,075,300.

The fire loss was the lowest since 1912.

During the year 1,271 inspections were made by Fire Marshal Koltonski, and with remarkably few exceptions, the citizens immediately complied with the orders of the Chief, and this hazard is steadily decreasing each year.

One hundred fifty-five wiring inspections were made, and as a direct result of corrections made, insurance rates were reduced \$1.50 per thousand on six business buildings.

During the summer the repeater in Station No. 1, which has been in use about thirty years, refused to respond to treatment, and a new repeater was authorized by your honorable

body. The Gamewell Fire Alarm Co. loaned us a repeater, which is being used until the new one can be installed.

Owing to the growth of the city the old repeater, made up of three circuits, was very much overloaded, 22 boxes being on one circuit.

The new apparatus will enable us to divide the city over five circuits with one connecting the two stations, and will provide facilities for a good many years.

One new box was added during the year and several more are recommended for this year.

I want to repeat my recommendation in regard to the purchase of a ladder truck. We have been fortunate in the past, but I feel I would be neglecting my duty if I did not urge that some action be taken on this matter.

The ladder in use is unsafe and cannot be repaired so that it will meet the requirements of apparatus of this nature.

An inventory of equipment and supplies on hand shows a total of \$46,256.10.

The disbursements for the year are as follows:

Pay roll	\$26,220 50
New equipment	898 96
Repairs and supplies	314 61
Auto repairs and supplies	1,637 20
Fuel	709 88
Laundry and Telephone	188 80
Light and power	450 68
Insurance	106 25
Sundries	139 65
Commissioner's salary, 1½ years	150 00

	\$30,816 53

POLICE DEPARTMENT

The Police Department is composed of the Chief of Police, 12 patrolmen and a number of special officers.

Two hundred and ninety arrests were made during the year: 129 for intoxication, 64 for breach of peace, or larceny,

43 for violation of automobile laws, 7 for burglary, 22 juvenile cases, and 25 for all other offenses.

Lodgings were furnished to 366 people during the year. Eighty-one places of business were found unlocked and owners notified.

During the year ten automobiles were reported stolen, nine of which were recovered. There was an unusually large number of breaks reported during the year where a small amount of property was stolen, but most of this was recovered and those responsible have been apprehended and punished.

The automobile police patrol purchased during the year has been of material assistance—174 calls were answered, 104 prisoners carried, in addition to regular patrol duty, a total of 6,635 miles was covered at a total cost of about \$250.00, of which \$120.00 was collected in costs.

Two traffic signals were installed during the year, and two more have been authorized, and will be installed in the Spring.

These signals have been of great assistance to the department in assisting the many tourists who visit our city as well as replacing unsightly traffic posts.

Two of our banks have installed burglar alarm equipment which is connected with our Police system, and several others are making necessary arrangements to take advantage of this service.

Through the courtesy of the Chamber of Commerce, Rotary Exchange and Engineers' Clubs, twenty-five signs were furnished and erected on our main thoroughfares by this department as an assistance to the traveling public.

An inventory of equipment and supplies on hand shows a total of \$7,273.00.

The expenditures for the year are as follows:

Pay roll	\$23,293 31
New equipment	1,388 34
Traffic signals and maintenance	959 88
Repairs and supplies	164 19

Patrol supplies and repairs	251 59
Laundry and telephone	53 22
Miscellaneous	67 46
Commissioner's salary, 1½ years	150 00
	<hr/>
	\$26,327 99

Respectfully,

FRED C. ROBERTS,

Commissioner of Public Safety.

ALFRED H. KOLTONSKI,
Chief Engineer.

Report of City Attorney

January 18, 1927.

To the Honorable City Council:

I herewith submit my report as City attorney for the year ending December 31, 1926.

The Telephone Rate case, which was pending at the time of my last report, was resumed in June, at which time the case for the people was presented by the Attorney-General of Vermont, Hon. J. Ward Carver, the Burlington City Attorney, Theodore J. Hopkins, Esq., and myself. This hearing consumed four days. On December 15, 1926, there was a final hearing before the commission at Burlington, and a few days later the commission handed down its decision in the case. This decision did not disturb the schedule of rates demanded by the Telephone Co. with the exception of minor changes in the definition of the toll area in the Barre district, and the rate charged for private branch exchange switch boards.

During the year two minor suits were brought against the City, but the same were never pressed to a conclusion. There was one suit of major importance brought against the City, namely, that of William F. Ball, as trustee for the Tauber Lipton Co., involving the matter of taxes which the plaintiff claimed had been illegally collected. This case was heard at the March term of Rutland County Court, and resulted in a verdict for the City.

During the year several insane paupers have been removed to the Brattleboro Retreat through the efforts of the Overseer of the Poor and City Attorney, and the City relieved from further liability for their support and care.

I have co-operated with the Tax Collector in the collection of taxes from delinquents; with the Superintendent of Schools in the collection of delinquent tuition fees, and attended sev-

eral hearings before the Public Service Commission in the matter of bus petitions.

In the first two months of 1926, I was engaged for several weeks in the proposed revision of the City Charter. In this work I had the assistance of Leonard F. Wing, Esq., who has been retained as special counsel.

At the present time there is pending an appeal of the F. W. Woolworth Co. from the decision of the assessors in the matter of the appraisal of their property on Merchants Row.

It has been a pleasure for me, during the past year, to advise the City officials, the members of the Board of Aldermen and various committees of the same.

Respectfully submitted,

J. A. CROWLEY,
City Attorney.

Report of Overseer of Poor

To the Honorable City Council:

I herewith submit my report as Overseer of the Poor for the year ending December 31st, 1926.

Respectfully submitted,

CHARLES G. NOYES,

Inspector of Buildings.

Report of Health Officer

To The Honorable City Council:—

I submit the following report for the year ending December 31st, 1926.

Contagious and infectious diseases reported:

German Measles	360
Whooping Cough	128
Mumps	100
Chicken Pox	77
Measles	29
Diphtheria	8
Scarlet Fever	9
Typhoid Fever	2
Pneumonia	11
Total	724

Inspections of Plumbing

27

WATER

I have sent a sample of the City water to the Laboratory at Burlington for examination, daily, except Sundays. The reports returned show the water to be in excellent condition and can be seen by any who so desire by calling at the City Clerk's Office, where they are on file.

MILK

There have been 59 samples sent for examination. The milk more than averages with that of other places as all samples have gone beyond the test called for and the number of samples reported as "Slight amount of visible dirt" have been greatly reduced in the last year making a fine record.

Respectfully submitted,

GEO. RUSTEDT, M. D.

Health Officer.

Report of Department of Public Health

Statistics for 1926 compiled from certificates filed in the City Clerk's office.

Report of District Nurse

To the Honorable City Council:

I submit the following report as District Nurse for the year ending December 31, 1926:

Whole number of nursing visits, twelve hundred seventy-five. Thirty-seven prenatal calls were made, twenty-six maternity cases cared for, and seventy-five visits in the interest of Child Welfare work were made. Supplies of medicines and clothing were furnished to one hundred seven families, and forty baskets of food and clothing were sent at Thanksgiving and Christmas into homes where there was sickness or need.

The expense for the year for salary, transportation and supplies was \$1,175.00; received from patients, \$443.00.

Respectfully submitted,

LUCIE P. CLARK,
District Nurse.

Report of City Weigher

To the Honorable City Council:

I respectfully submit the following statement of weighing done on the City scale during the year 1926.

Paid the City Treasurer for 1,706 weights.....	\$170 60
Weighing fees	85 30
Net	\$85 30
Number of loads of coal, etc., weighed for the school buildings and City Hall free of charge	116
Total number of weights	1,822

Respectfully submitted,

H. B. WHITTIER,

City Weigher.

Report of Rutland Hospital

Statement of the number of patients cared for at the Rutland Hospital during the year 1926 and the total expense of the service, as shown by a report made to the City Council by the Overseer of the Poor.

Total number of patients for the year	80
Board and care	\$2,715 50
Operating room	174 00
Medicine and supplies	89 27
X-ray service	165 00
Laboratory service	148 00
	\$3,291 77
Hospital credit	\$39 00
Paid City Treasurer	200 55
	239 55
Total expense	\$3,052 22

Report of Librarian

To the Officers and Members of the Rutland Free Library Association:

The forty-first annual report is herewith respectfully submitted:

Number of volumes in the Library Feb. 1, 1926	27,368
Increase by purchase	460
Increase by gift	30
Increase by binding periodicals	79
Books added from duplicate pay collection	144
	713
	28,081
Number of volumes withdrawn	133
Number of volumes in the Library Feb. 1, 1927	27,948
Number of volumes rebound, 1926	256
Number of volumes replaced	114
Circulation of books, 1926	88,373
Circulation of books, 1925	78,201
Increase in circulation for 1926	10,172
Circulation of foreign books	156
Circulation of volumes of music	77
Number of new cards issued, 1926	847
Number of new cards issued to children, 1926	463
Number of books drawn on teachers' cards during 1926	13,034
Number of books drawn on club, subscription and	

special cards for ministers, editors, etc.	8,035
Number of volumes drawn by children, 1926	26,410
Number of volumes drawn by children, 1925	22,065
Increase for 1926	4,345
School circulation	1,928
Number of teachers' cards in use, 1926	175
Number of subscription cards in use, 1926	150
Number of volumes repaired at Library, 1926	683
Number of days the Library has been open, 1926	303
Largest daily delivery, Jan. 29, 1927	568
Smallest daily delivery, Sept. 9, 1926	91
Average daily delivery	291
Average monthly delivery	7,364
Amount received from fines	\$502 68
Amount received from Association fees	88 00
Amount received from subscriptions	42 50
Total	\$633 18
Number of periodicals subscribed for during 1926	66
Number of periodicals received by gift 1926	62
Total	128

Report of the Board of School Commissioners

To the Mayor, City Council and Citizens of the City of Rutland:

The Board of School Commissioners herewith submits its report for the fiscal year ending December 31, 1926.

The social, political and economic changes which have taken place in the last generation and the changes which are bound to be made in the next generation are so varied, complex and profound that the business of providing a proper education for the rising generation is difficult in the extreme. If we were willing to accept the view held by some that the schools should continue to use the same subject matter and equipment which was adequate a generation ago, our task would be simple. But we believe that as the interpretation of life changes so the schools should change to properly fit young people to meet life as it actually is. Constant vigilance is the price we must pay to insure our country against ignorance and intolerance. Vigilance not only on the part of those especially charged with the duty of administering the schools of a community but on the part of every citizen as well. We maintain that the most important problem confronting Rutland today is the education of its children.

Complaint comes from certain quarters that education costs too much in comparison with the cost a generation ago. These critics overlook the fact that while general population in the United States has increased 79 percent since 1890, elementary school attendance has increased 156 percent, and high school attendance, where the per pupil cost is relatively high, has increased 2465 percent. They overlook the further fact that the cost of material and service in other fields has increased in cost. While the cost of all education, public and private, was three and one half times as high in 1924 as in 1912 we had over twice as much left to spend for other things. About twenty-

five percent of the increase in cost for education in the United States is chargeable to increased attendance, about forty-five percent to depreciation in the purchasing power of the dollar and about thirty percent to increased efficiency. The statement of Mr. Edward Filene, merchant and banker of Boston is typical of broad gage business men. He says: "I would give first attention to education. In apportioning public funds I would provide all the money needed for educational purposes before passing any other budgets, however important."

We affirm that education, in proportion to its immediate and ultimate value, is one of the cheapest commodities delivered to the American people. We believe that the buying power and the desire to buy is directly proportional to the educational level. The present prosperity of the country would be impossible if the general level of intelligence were not maintained at the present high point.

On of the surest ways to determine whether we are spending too much or too little on education is to compare our expenditures with those of other communities in the same class. With the desirability of comparisons in mind we have adopted a new system of accounting which is in general use throughout the United States. Our budget for 1927 based on the distribution provided by this system with the cost per pupil based on peak load for this year is given below:

	Total Cost	Cost per pupil	Percentage of total cost
1. GENERAL CONTROL: Superintendent's office; salaries, supplies and other expenses. Compulsory education	\$8,100	\$3 60	5.1 percent
2. INSTRUCTIONAL SERVICE: Supervisors, principals, clerks and supplies	9,282	4 13	5.8 percent
Teachers	\$99,920	44 41	
Text books	2,250	1 00	62.7 percent
Supplies and other expenses	3,400	1 50	
3. OPERATION OF SCHOOL PLANT: Janitors, fuel, light & power, supplies	18,400	8 18	11.5 percent
4. MAINTENANCE OF PLANT ..	8,745	3 88	5.5 percent

5. FIXED CHARGES: Rent, Insurance	1,820	81	
6. CAPITAL OUTLAY	3,030	1 34	1.9 percent
7. AUXILIARY AGENCIES: Libraries, Health, Recreation	4,400	1 96	2.8 percent
Total	\$159,347	70 82	

The people of Rutland have demonstrated on many occasions their willingness to properly support a reasonable program for the improvement of education. We are glad to be able to report that we believe we have spent their money with prudence and conscientious care. Out of fifty-five cities of our class in the United States forty-one spent more per pupil than we spend in Rutland; eleven of the remaining fourteen were southern cities where funds available for the support of schools are limited.

Pupil accounting assumes the same degree of importance in a school system as financial accounting. At the present time all our records of pupils in grades 1 to 8 are filed in wooden containers in the superintendent's office subject to the hazard of fire or other means of loss. In order that these priceless records may be properly safeguarded we have authorized the purchase of a commodious filing safe.

The repair of school buildings and the improvement of school grounds are matters to which we devote much time and energy. During the past six years we have renovated and repaired six of our eight buildings. We propose during the present year to do a complete job at the Park Street School and make a substantial start at the High School building. We expect to make a general plan for slight alterations and complete repairs at the High School and extend the repairs over a period of three years. We start with the ultimate plan which will fit the building for its intended use during the next twenty-five years in order that nothing may be done which is not permanently useful. By the end of the present year we expect to be able to say that every building is adequately provided with artificial lighting so that school work can proceed every day in the year without fear of undue eye strain.

In view of the fact that the eight school buildings now in use in Rutland represent a capital outlay of \$260,119 which sum includes all additions and extraordinary repairs except those occasioned by fire, and in view of the fact that the average age of the buildings is thirty-six years, the present condition of most of them is little short of remarkable.

Building	Date of Erection or Occupance	Cost	First Date	Addition Cost	Second Date	Addition Cost	Total Cost	CITY OF RUTLAND
High.....	1856	Estimated \$10,000 00	1879	Estimated \$20,000 00	1909	\$33,000 00	\$63,000 00	
Madison.....	1883	Estimated 7,000 00					7,000 00	
Kingsley.....	1887	12,285 00					12,285 00	
Longfellow.....	1891	23,609 00	1922	32,000 00			55,609 00	
Watkins Avenue.....	1893 to 1897	21,299 00					21,299 00	
Park Street.....	1893 to 1897	19,381 00					19,381 00	
Lincoln.....	1893 to 1897	26,403 00	1913	14,000 00			40,103 00	
Dana.....	1907	41,145 00					41,145 00	
							\$260,119 00	

Those who selected the sites for our present elementary school buildings exercised such wisdom and good judgment that all the children of the city can attend school with little inconvenience. As population increases in the various parts of the city additions can be made to present structures with a minimum of capital outlay and with very little added expense for general overhead and administrative expenses. In order that the interests of the city may be properly safeguarded and due consideration given to the future needs of elementary school children the purchase of more land near the school properties should be taken under consideration.

We desire to urge every citizen of our city to acquaint himself with the excellent work now being done in the public schools and to consider the lines of progress to be undertaken in the near future. Since society is dynamic it seems necessary that the schools give greater diligence to a study of present and future needs of people and less consideration to tradition. Certain it is that the schools of a community cannot get much ahead of majority opinion.

Our chief concern is the same as every other parent and good citizen, namely, to provide the best possible education for our young people at a cost which is reasonable and in harmony with present needs and future advantages.

Your Board is still of the opinion that conditions in the High School are such that we ought not to give up the hope that a new High School building may be provided in the near future.

Respectfully submitted,

BOARD OF SCHOOL COMMISSIONERS

By Lathrop H. Baldwin, President.

Rutland, Vermont, February 7, 1927

Report of the Superintendent of Schools

*To the Board of School Commissioners, the Mayor, City Council
and Citizens of the City of Rutland:*

I have the honor of submitting to you the thirty-fourth annual report of the Rutland Public Schools and the sixth under the present administration.

Our City Charter imposes on the superintendent of schools the duty of making an annual report concerning the condition and progress of the schools under his jurisdiction. There are a multitude of subjects concerning the schools of common interest to the citizens of this city, but the limitation of space for an extended report and patience on the part of the public in reading it, dictate the selection of a few pertinent facts, a limited number of outstanding achievements and a brief program of improvement for discussion.

The report of attendance for October, 1921, showed a total membership in all schools of 2072 pupils, while the same report for today showed a total of 2,267. The increase of 195 pupils indicated is accounted for by an increase of 164 pupils at the High School and 31 pupils in grades 1 to 8. These figures do not give a true indication of the situation with respect to grades 1 to 8, because during this period the ninth grade has been eliminated and absorbed. Since there were over 100 pupils in that grade in 1921 the actual growth in enrollment in grades 1 to 8 has been about 130 pupils.

During the school years 1922-23 and 1923-24 when grade 9 was in the process of elimination it was thought by many that the increases in registration at the High School were due to that cause and would, therefore, be temporary. Contrary to this prediction the increase in registration this year has been the greatest in the history of the school being 66 as compared with 42 in 1923.

To further illustrate the situation with respect to school enrollment your attention is directed to the fact that in 1921 we enrolled 204 pupils in the first grade while there are 260 in the same grade at the present time. In 1921 there were 34 pupils in the first grade at the Lincoln School. Today there are 73 such pupils.

The elimination of grade 9 and the organization of the Intermediate School was one of the most important achievements of this period. The acceptance of twelve years as the normal period between entrance on the first grade work and completion of high school is generally practiced and no argument in its favor is necessary. The organization of an intermediate school has resulted in a large increase in life dividends for the pupils attending the school.

The classification of pupils in ability groups has tended to bring out more of the latent talent of individuals than heretofore, while the possibility of an enriched curriculum has broadened the contacts of the children and made life more abundant for them. In a departmental school of this kind the special talents of teachers can be developed and utilized so that we may feel greater assurance of having the instruction possess real social value. The facts of history or geography or grammar may be taught in one place as well as in another, but if we conceive education as a developing, unfolding and broadening process then the advantages of such a school for children of these grades is apparent. The people of the city are just beginning to realize that the benefits which the children receive at the Intermediate School far exceed in value the additional cost of it.

The superintendent of schools may become so engrossed in devising ways of increasing the size of the school plant of a community or in modernizing equipment and instruction that he loses count of the many steps of advancement made daily by the pupils and teachers of his schools. To be sure the big noise about modern buildings and adequate equipment is made in order that teachers may teach more effectively and children may learn more surely.

During the period under consideration 443 pupils have graduated from High School, 120 of whom have continued their education in college. For the same period 868 pupils have completed the eighth grade and been promoted to High School and 5787 pupil year promotions have been made in grades 1 to 7. It is difficult to estimate the increased earning capacity, the improvement in ability to make a social contribution or the added power for real enjoyment in life, but we are blind indeed if we do not see that such a record is one of real achievement with great promise for the future.

At the present time there are two hundred sixty pupils in our first grade classes. These children are accepted in school on the basis of a chronological age of six years. The mental, physical and social ages of these children vary all the way from four years to seven or even eight. In spite of this disparity in ability age 80 per cent or about 208 of these children will be promoted next June, which means that that number of children are able to read fluently material suited to their age, to spell 160 selected words with a low percentage of error, and to grasp the number facts which are needed. In addition to these tool subjects the child has discarded much of his street pronunciation, has become independent regarding his wearing apparel, is more observing, carries on a more intelligent conversation, and in short has made great strides toward fitting into the social scheme of things.

Teachers, like members of every other profession, tend to acquire habits of indifference with respect to professional growth. During the five years just past our Rutland teachers have given abundant evidence that they realize it is only by diligent effort that a teacher can continue to render the service which her calling merits. Thirty-four of our teachers have devoted a major part of one or more summers to advanced work earning, by so doing, the equivalent of 294 units of college credits and spending an aggregate of 332 weeks, or the equivalent of ten college years, in schools for professional advancement. Forty-two teachers have earned a total of 80 credits by means of extension courses.

The point of contact between the organization known as

the school and society is made when the teacher teaches and a pupil learns. The whole beautiful structure of organization and fine spun theories falls to the ground unless the teacher is qualified to develop the latent powers of each child and unless the child finds happy employment while he grows into a useful citizen. Our first duty, therefore, is to make class room teaching more effective by an increasing number of means.

The development of sympathetic and constructive supervision with the principal as the main agency of contact needs our close study and consideration. Our progress in this direction depends upon a daily contact between teacher and supervisor which only the principal can give. We have already developed certain basis standards which are understood by all our teachers because they have participated in the enterprise.

As better supervisory standards are set up we will be able to use more intelligently modern tests for the classification of pupils and to secure a better understanding of their needs and capabilities.

As an agency for the improvement of instruction, the course of study takes first rank. Some of our larger cities are spending from sixty to a hundred thousand dollars to prepare suitable syllabi. We are not prepared to spend any considerable sum of money for this purpose at the present time nor have we the supervisory, research and technical staff necessary for such work. We shall, however, examine many of the new courses as they appear and adopt for our temporary use those best suited to our needs. It is inexcusable for a school system to hamper the intellectual growth and social development of the children in its schools by presenting to them worn out subject matter.

We now conceive of education as a growing and constantly changing process. The methods of procedure and the subject matter of today may not be suitable at all tomorrow. The changes which are being made and the improvements being introduced are the result of experiment and research in many parts of the country. In Rutland we have attempted to follow a conservative-progressive policy limiting changes to those giving greatest assurance of improving instruction and making sure that the children would suffer no loss in the process of

experimentation. The educational world is moving on with such rapidity, however, that our teaching staff needs to be alert at all times to discover improvements in method or subject matter.

The outlook for improvement in instruction and understanding is most promising. Our teachers, principals and school board have been able to make many contributions to progress because harmony and good will have prevailed. The parents of the children entrusted to our care have shown great patience and a willingness to unite their efforts with ours to the advantage of the school children.

May I say that it is a great pleasure to work with so excellent a group of teachers and parents and in a community where the welfare of the citizens of tomorrow is regarded as a matter of much importance.

Respectfully submitted,

W. W. FAIRCHILD,
Superintendent

Rutland, Vermont, February 7, 1927.

Report of Auditors

To the Honorable City Council:

Your auditors have audited the books of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools, and Sinking fund Commissioners from January 1, 1926, to December 31, 1926, inclusive, and find they have duly accounted for all monies received by them and that they have proper vouchers for all monies expended.

We find the records of disbursements as shown by the City Clerk and Superintendent of Schools in agreement with the entries on the City Treasurer's books. We have checked the cash and verified the notes, bonds, deposit books and securities in the hands of the City Treasurer and Sinking Fund Commissioners, and found them to be correct.

The Treasurer's book shows a balance of uncollected taxes as follows:

1904, 7, 8, 12, 13, 17, 18, 19, 20	\$421 81
1921	118 99
1922	178 37
1923	249 91
1924	570 16
1925	1,299 40
1926	3,522 98

	\$6,361 62

The books and records of the City Treasurer's office are in their usual excellent condition and very clearly show the city's true condition.

Respectfully submitted,

R. D. SMITH,
H. A. COLBURN,
EARLE T. TOWER,
City Auditors.
